

# Fabrication & Facilities

Jalna Construction Ltd boasts two fabrication halls both with heavy lifting facilities. Jalna Construction is situated on Dawsons Wharf on the North Sea Supply Base. The wharf workshop is serviced with a 5 tonne overhead crane with 8 m under the hook. There is direct access to four berths along a kilometre-long stretch on the south side of the River Tees capable of handling vessels of up to 200m served by cranes up to 220 tonnes. Mickleton Road, is purpose built, 50m long x 20m span x 9m to eaves with 2 no 15 tonne overhead cranes with 7m under the hook, giving a 30 tonne tandem lift. The building is clad with composite cladding and a heavy duty concrete floor with sliding doors to the main doorway 6m wide x 7m high with a removable section above to give 9m high for special projects. Jalna Construction has a strong portfolio of successful fabrication projects undertaken for renowned world leading clients.

## Some of our recent fabrications include:

- Ship transportation cradles
- Subsea lifting beams
- Spreader mats
- Offshore mooring buoys
- 12 meter work boat
- Steel portal buildings

## Equipment

- Amanda Guillotine CNC controlled shearing 3m wide x 12mm thick CNC Profiling with Burny 10 control system and a bed 6m x 3m capable of cutting steel 100mm thick.
- Bronx Press Brake CNC controlled 180 tonne with 4m long bed Kingsland Steelworker.
- 6ft Radial arm drill

Jalna Construction Ltd has gained a reputation as a market leader in fabrication in all aspects of unique heavy specialist fabrications. All of our work is backed up by ISO9001 and CE marking accreditations.
